JUMBO®

high tex solutions

The climate neutrality is achieved through the use of carbon credits from climate protection projects certified in accordance with the TÜV Rheinland EcoPLUS standard.

For JUMBO-Textil GmbH an EcoPLUS climate protection project in the field of hydropower in Indonesia is used, which meets the following criteria:

- **Sustainability:** EcoPLUS certified projects ensure that sustainable and socially beneficial structures are promoted and nurtured.
- **Optimal Project Location:** With the use of globally recognised indices EcoPLUS selects climate protection projects that have the highest positive impact and promise the most improvement at their respective location.
- **High efficiency climate protection:** EcoPLUS certified projects provide major green house gas savings and thus, are ensured to have the highest possible potential for mitigating climate change.
